**2. Read the passage carefully and answer the following questions.****8**

Cancer is a very dangerous disease that spreads abnormally in the human body. There are many types of cancer but blood cancer, breast cancer, brain cancer. and skin cancer are very common. Breast cancer occurs mostly in women. In study, it has been found that more than 100 types of cancer can affect the human body.

Doctors do some tests to diagnose cancer such as CT scan, CBC and WBC test Hemoglobin test, MRI's etc. To prevent cancer, they advise cancer patients to eat more tomatoes, broccoli, ginger, turmeric etc.

Although cancer is mostly caused by the use of tobacco, but obesity, poor diet, and drinking alcohol can also be the reason for it.

- |                                                       |   |
|-------------------------------------------------------|---|
| 1) What is cancer ?                                   | 1 |
